Solid Fuel Boiler Control Device

Control unit developed for solid fuel boilers. Provides heat measurement and control with stoker and manual operating modes. Offers user-friendly interface with single 7-segment display. Designed for safe and efficient heat management.

- Heat Measurement & Control
- Stoker Operating Mode
- Manual Operating Mode
- 7 Segment Display

TECHNICAL SPECIFICATIONS

Feature	Value
Display	Single 7 segment display
Control Modes	Stoker and Manual
Sensor Input	NTC temperature sensor
Relay Outputs	Stoker, Fan, Pump
Safety Features	Overcurrent protection
Mounting	Panel mount
Application Area	Solid fuel boilers
Connection	Wi-Fi mobile app (Optional)

TYPICAL APPLICATION

NTC Sensor

BC-01

Boiler
