
 7 SEGMENT
DISPLAY

MULTI CHANNEL

 Analog Input
4-20mA

 Analog Input
0-10V

DIGITAL I/O

MODBUS RTU

MODBUS-TCP

CONTROL DEVICE

GDT

Compact Sensor Communication Unit

High contrast LED display for easy reading in all lighting conditions. Processes sensor measurements with up to 2 analog input channels. Communicates via Modbus protocol for integration with SCADA/PLC systems.

- 1-2 Channel Analog Input

- Digital Display & Indicator

- 3 Digital Input & Output

- Modbus TCP & RTU

TECHNICAL SPECIFICATIONS

Analog Channels	1 – 2 channels
Input Types	4–20mA, 0–10V, 2/3 mV/V, 0-100mV
Digital Input	3 channels
Digital Output	3 channels
Analog Output	0–10V or 4–20mA
Communication	Modbus RTU (RS485), Modbus TCP (Optional)
Resolution	24-bit

TYPICAL APPLICATION
